Control and Agency

	Code Name	ID	Description	Colour
1	Desire for post-send control	C1	Participant wants to modify or withdraw photos after sending	Red/Coral
2	Increased perceived control	C2	Participant feels the design gives them more control over shared photos	Red/Coral
3	Current options perceived as binary	C3	Participant sees existing WhatsApp as all-or-nothing (full send or view-once only)	Red/Coral
4	No time limit on changes valued	C4	Participant appreciates being able to revise permissions indefinitely after sending	Red/Coral
5	Sender control justified	C5	Participant believes the sender should have primary control as the photo owner	Red/Coral
6	Accidental send as motivation	C6	Participant motivates control through sending wrong photo to wrong person	Red/Coral
7	Relationship change as motivation	C7	Participant links need for control to breakups, disputes, or changing trust	Red/Coral
8	Feature increases sharing confidence	C8	Participant says the feature would make them more confident or more likely to share photos	Red/Coral

Understandibility and Clarity

	Code Name	ID	Description	Colour
1	Pre-send controls understood	U1	Participant correctly interprets the permission composer screen	Blue
2	Post-send controls understood	U2	Participant correctly interprets post-send permission change options	Blue
3	Recipient states correctly interpreted	U3	Participant reads the recipient-side view (visible, revoked, request access) accurately	Blue
4	Co-subject label confusing	U4	Participant cannot understand the 'co-subject in photo' term without explanation	Blue
5	View-once toggle wording confusing	U5	Participant unsure whether 'view once disabled' means the feature is on or off	Blue
6	View-once and time-limit perceived as overlapping	U6	Participant sees these two features as doing essentially the same thing	Blue
7	Revocation equated with deletion	U7	Participant assumes revoking access means full erasure rather than access withdrawal	Blue
8	Forwarding model initially misunderstood	U8	Participant initially misinterprets how forwarding with inherited permissions works	Blue

Trust and Transparency

	Code Name	ID	Description	Colour
1	Screenshot warning valued as honest	T1	Participant sees the disclaimer as making the design more trustworthy or realistic	Green
2	Screenshot warning undermines feature value	T2	Participant questions the point of permissions if screenshots can't be prevented	Green
3	Screenshot warning not noticed	T3	Participant didn't see the warning until it was pointed out by the interviewer	Green
4	Screenshot warning should be bigger	T4	Participant suggests the disclaimer needs more visual prominence	Green
5	Increased platform trust	T5	Participant says the design would increase their trust in WhatsApp	Green
6	Platform trust unchanged	T6	Participant says trust is about interpersonal relationships, not the platform itself	Green
7	Platform exploitation concern	T7	Participant worries platforms/apps could misuse the feature to harvest sensitive data	Green
8	Limited but meaningful control acknowledged	T8	Participant recognises revocation is partial but still sees value in bounded control	Green

Social Emotional Impact

	Code Name	ID	Description	Colour
1	Revocation feels normal/fair as recipient	S1	Participant would accept revocation without negative feelings	Purple/Pink
2	Revocation feels suspicious/annoying as...	S2	Participant would question why access was revoked, feels uneasy	Purple/Pink
3	Revocation feels offensive as recipient	S3	Participant uses strong negative language (offended, betrayed) about receiving revocation	Purple/Pink
4	Revocation signals mistrust	S4	Participant interprets revocation as the sender not trusting them	Purple/Pink
5	Context-dependent emotional reaction	S5	Participant says their response would depend on relationship and situation	Purple/Pink
6	Request access seen as helpful	S6	Participant values the option to ask for renewed access	Purple/Pink
7	Request access feels awkward/weird	S7	Participant finds requesting access back socially uncomfortable or illogical	Purple/Pink
8	Request access spamming concern	S8	Participant worries recipients could abuse the request feature repeatedly	Purple/Pink
9	Wording perceived as neutral	S9	Participant finds the interface language non-blaming and appropriately factual	Purple/Pink
10	Limitation wording confusing	S10	Participant finds the 'screenshots, saved copies or prior viewing may already exist' text unclear	Purple/Pink
11	Prefer complete erasure over placeholder	S11	Participant would rather the message disappear entirely than show a revoked state	Purple/Pink

Forwarding/Redistribution

	Code Name	ID	Description	Colour
1	Forwarding inheritance understood	F1	Participant correctly interprets that sender permissions carry to secondary recipients	Yellow/Orange
2	Prefer simple binary for forwarding	F2	Participant wants forwarding either fully blocked or fully allowed, not propagation	Yellow/Orange
3	Permission hierarchy suggested	F3	Participant says forwarder should be able to restrict further but not loosen permissions	Yellow/Orange
4	Forwarding inheritance valued	F4	Participant sees inherited permissions as providing additional security layer	Yellow/Orange
5	Screenshot-download contradiction identified	F5	Participant notes blocking downloads while screenshots remain possible is illogical	Yellow/Orange
6	External device capture concern	F6	Participant identifies taking a photo with another device as an unavoidable risk	Yellow/Orange

Co-Subject Multi-Party Privacy

	Code Name	ID	Description	Colour
1	Co-subject feature valued for privacy	CS1	Participant sees the feature as genuinely protective for depicted people	Teal/Dark green
2	Co-subject misuse/abuse concern	CS2	Participant worries the feature could be used maliciously or as a joke	Teal/Dark green
3	Co-subject makes system too complex	CS3	Participant feels the feature overcomplicates the overall design	Teal/Dark green
4	Co-subject compared to Instagram tagging	CS4	Participant maps the concept onto existing tagging mental models	Teal/Dark green
5	Equal control between sender and co-subject	CS5	Participant believes both should have balanced power over the photo	Teal/Dark green
6	Co-subject should have stronger control	CS6	Participant favours the depicted person's rights over the sender's	Teal/Dark green
7	Unanimous consent / veto model	CS7	Participant says if any co-subject objects, the photo shouldn't be sent	Teal/Dark green
8	Sender motivation to tag questioned	CS8	Participant doubts senders would voluntarily identify co-subjects	Teal/Dark green
9	Co-subject feature unrealistic	CS9	Participant questions technical feasibility or real-world adoption	Teal/Dark green
10	Selective image modification suggested	CS10	Participant suggests blurring co-subjects rather than removing the whole photo	Teal/Dark green
11	Persistent consent preference suggested	CS11	Participant proposes 'always accept from this person' to reduce friction	Teal/Dark green
12	Legal/regulatory value perceived	CS12	Participant sees co-subject notification as evidence of informed consent for legal purposes	Teal/Dark green
13	Anti-bullying / safety value	CS13	Participant connects co-subject feature to protection against bullying or harassment	Teal/Dark green

UI Design Feedback

	Code Name	ID	Description	Colour
1	Permission labels take too much space	D1	Participant finds in-chat permission indicators clutter the conversation	Grey/Light blue
2	Prefer hidden/on-click permission display	D2	Participant wants permissions accessible via tap/click rather than always visible	Grey/Light blue
3	Info button suggested	D3	Participant wants an explanatory tooltip or info icon for each permission	Grey/Light blue
4	Toggle/slider UI preferred	D4	Participant suggests on/off switches instead of current button/text interaction	Grey/Light blue
5	Two-path design valued	D5	Participant appreciates having both 'send' and 'send with permissions' options	Grey/Light blue
6	WhatsApp consistency appreciated	D6	Participant notes the design feels familiar and navigable within WhatsApp patterns	Grey/Light blue
7	Redundant revocation messaging noted	D7	Participant notices revoked state is communicated multiple times or inconsistently	Grey/Light blue
8	Send button visual distinction poor	D8	Participant finds the two send buttons don't look different enough	Grey/Light blue
9	Screenshot warning placement/size criticism	D9	Participant says the warning is too small or poorly positioned	Grey/Light blue
10	Restrictive defaults proposed	D10	Participant suggests permissions should default to restrictive rather than open	Grey/Light blue
